Hearst Power Distribution Company Limited has applied to the Ontario Energy Board to raise its electricity distribution rates effective May 1, 2021. If the application is approved as filed, a typical residential customer and a typical general service customer of Hearst Power Distribution Company Limited would see the following increase:

Residential 750 kWh	\$5.22 per month
General Service less than 50 kW (2000 kWh)	\$4.90 per month

Other customers, including businesses, may also be affected.

THE ONTARIO ENERGY BOARD WILL HOLD A PUBLIC HEARING

The Ontario Energy Board (OEB) will hold a public hearing to consider Hearst Power's application. During this hearing, which could be an oral or written hearing, we will question Hearst Power on its case for a rate increase. We will also hear questions and arguments from individuals that have registered to participate (called intervenors) in the OEB's hearing. At the end of this hearing, the OEB will decide what, if any, rate increase will be allowed.

Distributors such as Hearst Power typically apply for a full review of their rates every five years. Any rate changes for the years in between are made by applying an OEB-approved formula which is tied to inflation and other factors intended to promote efficiency. You may not get notice of future rate changes made by applying the formula.

The OEB is an independent and impartial public agency. We make decisions that serve the public interest. Our goal is to promote a financially viable and efficient energy sector that provides you with reliable energy services at a reasonable cost.
